

C2 Project: **Social Media Analytics for Strategic Branding**

Objective:

Leverage Excel for data extraction, cleaning, and analysis of social media metrics to uncover brand insights and optimize marketing strategies. Build a complete Social Media Intelligence Solution in Excel that not only consolidates raw data but drives business insights, answers strategic questions, and empowers the team to make data-backed marketing decisions.

One of the Brands You Will Work On: Apple, Tesla, Spotify, Amazon, Pepsico

Note: The brand you will work on, along with the datasets and a detailed problem statement, will be shared with you by the team at the beginning of child course 2.
